

Retrospective Attendance Regularisation Guidelines

1. As a part of good practice, Leave and OD should be planned and approved in advance and updated in ESS promptly.
 - Regularisation of attendance pertaining to Flexitime (if applicable), Forgot-to-punch, Sick leave, etc., should be updated in ESS on a weekly basis by employees since they cannot be planned and regularised in advance.
2. Employees are expected to continue to follow discipline pertaining to the above point.
3. In view of the above, any retrospective regularisation of attendance, beyond the week will be needed only in case of emergencies on exceptional basis.
4. The following guideline helps employees in managing the attendance data for such exceptional requirements.
5. Henceforth, any retrospective regularisation of attendance (i.e., updating backdated Leave, OD, Flexitime (if applicable), Forgot-to-punch, etc.) of an instance will not be allowed beyond three calendar months, including the current month.
 - *Example 1: On 10th May 2023, an employee is allowed to regularise past attendance data for the period between 1st March 2023 to 10th May 2023 and is not allowed to update past attendance data for any date before 1st March 2023.*
 - *Example 2: On 20th May 2023, an employee is allowed to regularise past attendance data for the period between 1st March 2023 to 20th May 2023 and is not allowed to update past attendance data for any date before 1st March 2023.*
 - *In a nutshell, on any date in the month of May 2023, updating past attendance data for any date before 1st March 2023 is not allowed.*
6. During the year-end closure of attendance, any communication from the Time office will supersede the clauses mentioned above, i.e., last date for regularisation of attendance of a day in December would be as communicated by the Time office.
7. This will be effective 1st April 2023.
8. Any pending regularisation of previous Leave, OD, Forgot-to-punch, and Flexitime (if applicable) data from Jan 2023 must be completed by 17th April 2023.
